## Tony Gravley of Next Generation K9

Is returning to DKC for a two-day Scent Work Workshop

### UNDERSTANDING COMMUNICATION

Saturday July 8 2023 and Sunday July 9 2023

Tony Gravley's training plan is directly modified from his years of training detection dogs and teams. His prior Search Monster Workshop tapped into problem solving and giving dogs the tools to solve problems and give them the motivation to get to source. Going forward to Understanding Communication, even you will see where the path of the odor is going. You will also see the communication before and beyond the alert. Both your training plan and your trailing will greatly benefit from the knowledge.

Tony Gravley is well known for his excellence in the professional detection/protection dog world as handler, trainer, breeder and program manager in both Military, Law Enforcement, Federal Government Contracted Canine - industry settings. He is known in companion dog scent sports as trainer, handler, instructor and judge. Critical to companion dog search teams, Tony understands how our dogs are the same as – and different from – professional working dogs. Tony brings his unique experience and skills for a weekend of learning and working with our dogs.

Pre-requisites for working teams: A handler may only work one dog during the workshop. To participate as a working team, your dog must understand the search game, and be working at the Advanced or above. **Auditors may be at any level.** Dogs may be crated inside. However, if your dog is disruptive, you will be asked to crate in your car.

**WORKING: Single Day: \$175, Both Days: \$300 (limited to 12 working teams each day)**

**AUDIT: Single Day: \$75, Both Days: \$100 (limited to 25 audit slots per day)**

Check in between 8:00-8:30 am. Seminar will run 9 am to 4:30 pm each day Coffee, Water and Lunch will be provided.

*There is to be no taping of the workshop except that working spot handlers may video their own dogs for training purposes. No videos of exercises are to be posted on social media.*
